Sustained Yield Program for Bend Area Recommended

Committee Declares Every Possible Effort on Part of Community Justified

A Bend chamber of commerce reforestation committee appointed last spring, shortly following the publication of a news dispatch which quoted National Forester F. A. Silcox as saying that "Bend is living in a state of impending disaster" because of current timber handling methods, today submitted a report on its nine months' study. The committee recommends a sustained yield program for the Bend operations.

"Your committee believes that the losses that will be suffered if no sustained yield program is arranged, and the
