WSU Executive Policy 41

Engagement

Consultation

Consent

Tribal Green Transportation Project

Washington • Oregon • Idaho • Montana

Project Goals

Eliminate barriers to tribal ZEV access Foster community-directed engagement identifying concerns, needs, and opportunities. Facilitate active participation and direction from Native communities, ZEV and utility experts, and our Clean Cities partners.	Generate greater ZEV awareness Generate greater awareness broadly at many popular, tribal-sponsored events. Foster awareness at more technical energy and climate events and support tribal participation in green transportation programs.	Build ZEV technical capacity Support creation of community-directed ZEV transition plans and site-specific TA and workforce training, building tribal and utility capacity for future progress.	Support long-term pollution reduction by ZEV market expansion Reduce GHG and air pollution through greater adoption of ZEVs and the infrastructure to support them throughout Indian Country and generally in rural areas.
